Your photos will be mailed to you (5 weeks after the wedding) as high resolution images on a thumb drive.

All photos are edited (selected out of all that we take, cropped, color corrected, exposure adjusted) and include the rights to print and to post online. Your photos are also hosted in an online gallery/store for your family and friends to order prints from for up to a year after the wedding.

Video files are delivered as unedited “raw footage” onto your own external hard drive.

We record audio in addition to the on-camera microphones. Video files loaded onto your external hard drive are not edited and separately recorded audio is not synced to the footage unless a specific edit is purchased.

Audio from your DJ’s soundboard and from LAV microphones on people speaking will be added to your edits.

Any edits you would like must be purchased within one year after your wedding.
